

SAMUEL HARE - SENIOR LANDSCAPE ARCHITECT

Samuel joined CLOUSTON associates in 2014 with a Bachelor of Landscape Architecture from the University of Melbourne following two years working at a Melbourne based boutique residential design firm. Samuel brings a well-rounded professional approach to our team with a mixture of technical and innovative skills as well hands-on experience in the field. On top of his ongoing work at CLOUSTON he has completed his registration with the Australian Institute of Landscape Architects (AILA) and currently represents the local industry through his role as the AILA NT Chapter President.

Since moving to the NT, Samuel has become fully immersed in a wide range of projects throughout the Top End and beyond. He has enjoyed, and thrived, collaborating with an array of clients, consultants and contractors to gain a broad portfolio of project experience. From developing the landscape of new suburbs in the greater Darwin area to the creation of stimulating play areas in education, he has successfully progressed projects from the Masterplanning/ Conceptual Design process into quality built projects. His ability to identify client's needs and aspirations has helped drive and achieve successful outcomes bringing goals to fruition.

These experiences, which are detailed below, assisted him in adapting to the new challenges presented to him in the urban and remote environments of Northern Australia. His ability to work both independently and the opportunity to engage collaboratively with colleagues and clients continue to strengthen and expand his knowledge and experience in the built environment.
