

## TONY COX - NT MANAGER - LANDSCAPE ARCHITECTURE

Tony Cox is the NT Manager of Landscape Architecture at CLOUSTON Associates, having been a practicing Landscape Architect since 1986. Before joining CLOUSTON Associates in 1992, his professional career included experience in the public sector, large multi-disciplinary practices and as a sole practitioner.

Within CLOUSTON Associates, Tony has played a central role in a diverse range of planning, urban design, and masterplanning projects undertaken across northern Australia, central Australia and South East Asia. His specialist expertise lies in his ability to draw out the core principles and distinguishing characteristics of any planning and design project. He brings to every project a planning/design ethos based on local 'language' and design integrity matched with the best practise environmental outcomes.

His ability to produce robust, inspirational documents is evident in the many awards afforded to CLOUSTON Associates and our clients. Most recently, the office has received an NT AILA Award in urban design for 'Cooling Darwin', a body of work encompassing multiple projects throughout the city. CLOUSTON also received the consultant excellence award from UDIA (NT) in 20019. Tony has been at the forefront of new approaches to cooling urban areas, transforming streets and enhancing visitor experiences and understanding of natural areas and parks.

Tony continues to be an active member of AILA, is a past National President and was Chair of the Community and Environment Committee for 4 years. More recently, he has been a member of the NT Government Architects Expert Advisory Committee and was a an expert panel member of Darwin City Tree Replacement Advisory Committee following the devastation of Cyclone Marcus.
